cafetto[®]

QUALITY THAT'S INDEPENDENTLY CERTIFIED

At Cafetto[®] we recognise the need to protect the health and safety of anyone who comes into contact with our products. That is why we have implemented and maintain a consistent, effective, hygiene system that meets or exceeds global standards, allowing you to have confidence in hygiene and safety with Cafetto[®] products. We do all of this whilst remaining environmentally conscious across all aspects of our business.

ISO 14001 ENVIRONMENTAL MANAGEMENT SYSTEM

Cafetto[®] is proudly certified with the ISO 14001 Environmental Management System. This environmental management system is made up of a set of rules and regulations that define how our company interacts with the environment across all aspects of the business. As care for the environment is vital, we follow specific guidelines and processes that focus on:

- Sustainability
- Preventing Pollution
- Minimising our Environmental Footprint

This includes resourceful management processes such as packaging and chemical waste recycling, reducing packaging materials by producing highly concentrated products, eliminating product spills entering the stormwater system with bunding of entire factory site, and using external waste management services. All elements within the Environmental Management System allow Cafetto[®] to confidently maintain the highest standard of environmentally conscious processes throughout the business.

ISO 22000 FOOD SAFETY MANAGEMENT SYSTEM

ISO 22000 ensures the safety of the global food supply chain to the highest standard. It is an internationally recognised certification standard based on the most advanced technological, scientific, and managerial expertise. This certification has created a level standard across food safety management systems worldwide. Cafetto[®] customers can be assured that our products adhere to this high standard.

HACCP

Cafetto[®] is compliant with HACCP requirements for the production of cleaning chemicals. HACCP is a food safety and risk assessment plan that stands for Hazard Analysis and Critical Control Points and outlines seven key principles in food safety:

- Hazard Analysis
- Critical Control Points
- Critical Limits
- Critical Control Monitoring
- Corrective Action
- Procedures
- Record Keeping

HACCP can be applied to all processes throughout each and every stage of the food supply chain. This includes production, preparation, packaging and distribution.

ISO 9001:2015

ISO 9001 is a standard that sets out the requirements for a quality management system. It helps businesses and organisations to be more efficient and improve customer satisfaction. Our organisation complies with the requirements of ISO9001:2015 for the development, manufacture, and despatch of cleaning chemicals.

Cafetto[®] and MFC[®] are all registered trademarks.

MILK FROTHER CLEANER

MFC® GREEN

An acidic, organic descaler. MFC® Green contains biodegradable detergents and is derived from natural acids. Acidic cleaners deliver high levels of effective scale removal while sanitising. Milk lines must be flushed with water before use.

It is recommended that MFC® Green is used more frequently than the other MFC® cleaners due to its milder properties.

RECOMMENDED FOR*:

Organic systems

AVAILABLE IN:

1L bottles with dispensing chamber (carton code E27885 - 6 bottles)
